

Robert McDaniel
Appointed as President and CEO for SCD.USA LLC

SCD.USA LLC, a subsidiary of SemiConductor Devices, a global leader providing cutting-edge technology in infrared detectors and laser diode products, has appointed Robert McDaniel as President and CEO. Mr. McDaniel is a veteran within the Infrared / Electro-Optical industry for Aerospace and Defense applications. Prior to joining SCD.USA, Mr. McDaniel served as Vice President of Sensors and Electro-Optics Solutions for Elbit Systems of America. Throughout his 30-year career, he has held various management and leadership roles in the development and production of advanced electro-optics systems.

“Robert brings a wealth of knowledge and expertise to SCD.USA”, states Baruch Glick, CEO of SemiConductor Devices. “He has a tremendous background and sense for our business from both a technical and strategic perspective. Robert will be a valuable asset to the future growth and expansion of SCD.USA.”

Mr. McDaniel has authored a number of publications in electro-optics technologies. He holds a Bachelor of Science Degree in Physics from the Florida Institute of Technology, in Melbourne Florida and a Master of Science in Applied Management from Lesley University, in Cambridge, Massachusetts.

About SCD.USA:

SCD.USA LLC was established in August 2007 by its parent SCD.USA Inc., a Delaware company. SCD.USA Inc. is a U.S. Holding Company established and funded by SemiConductor Devices an Elbit Systems and Rafael Partnership ("SCD").

SCD.USA is a fast growing player in the field of infrared detectors in the US and will bridge between SCD's forefront, state-of-the-art capabilities, technologies and products in this field and the U.S. / Canada growing market demand for reliable, advanced products tailored to the customers' needs. For further information, please visit our website at www.scdusa.com or call us at SCD.USA in Melbourne, Florida at (321) 724-6146

About SCD:

SCD was established in 1986 by the current Israeli Partnership of Elbit Systems and Rafael. The main plant is located in the Leshem Industrial Park, Galilee Mountains, Israel. SCD employs well over 450 personnel and supplies over 7,500 detectors per year to the worldwide market. SCD's main line of products encompasses a diverse portfolio of advanced infrared detectors (InSb, MCT and VOx). Additionally, SCD is a world class supplier of 2D arrays and High Power laser diodes (pulsed, QCW, CW).
